3

Course recap

4

Assessment feedback

5

Points prizes 🙄

Hour 2

6

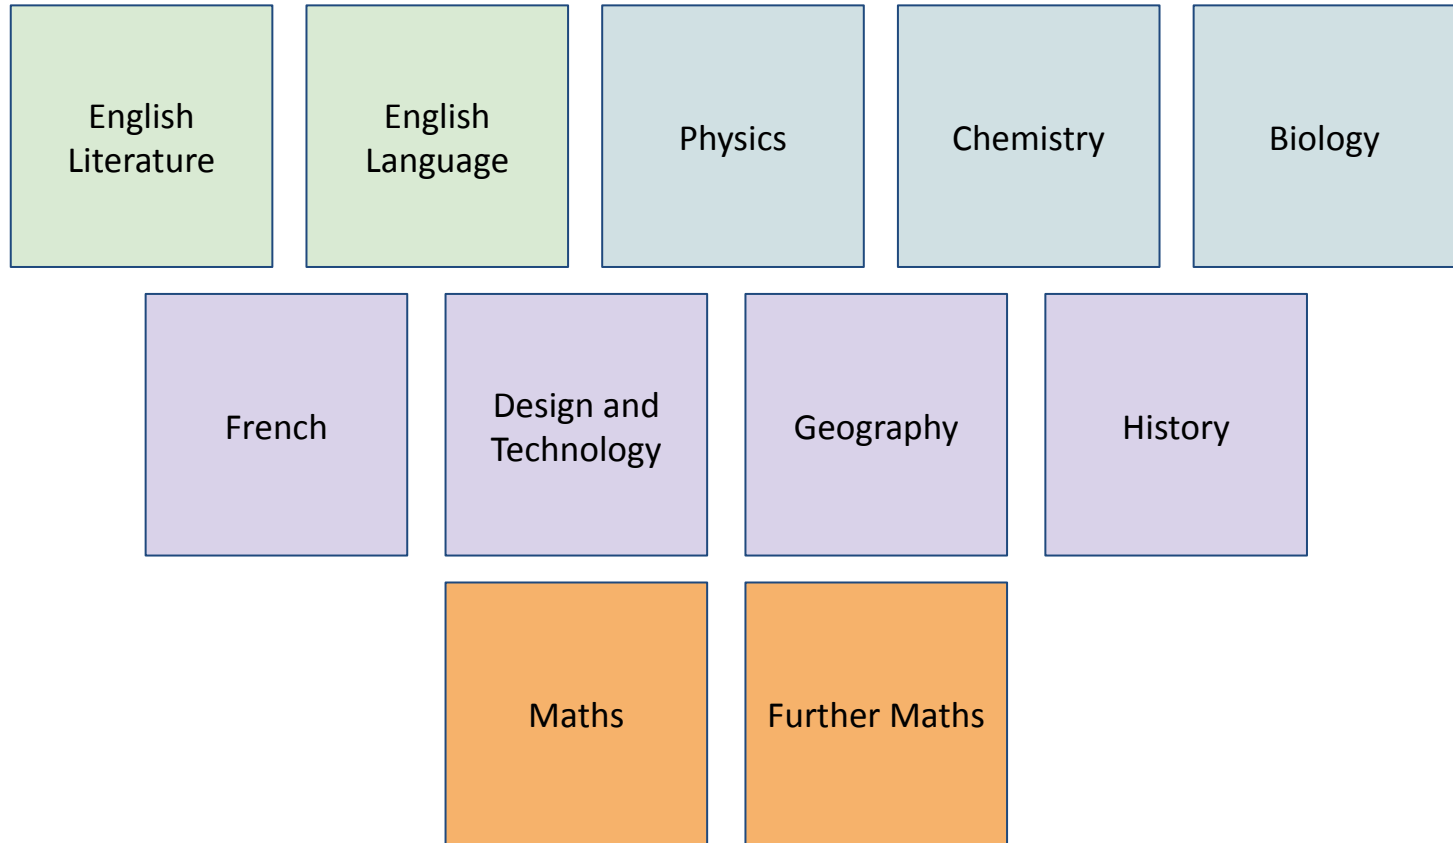

End of course survey

Next Steps Continued

GCSEs / IGCSEs / other

- I would recommend **taking what you enjoy**
- You're still broad enough that you haven't got to worry about shutting off careers
- Only really important one is maths (and further maths if you can take it at school)

GCSEs / IGCSEs / other

A-levels / SATs / Others...

- Have to be a bit more careful when picking them.
- The subjects I would consider most useful for AI (in order)
 1. Maths
 2. Further Maths
 3. Computer Science
 4. Physics?
 5. Economics?
 6. Philosophy?

A Levels

Maths

**Further Maths
(further pure and
statistics)**

Physics

Economics

What else can you do outside of school?

- Many of you are quite young still.
- What can you do **now** to improve your AI skills?

1

Python, python, python!

- Most important thing you can do for sure
- You're going to see a lot of maths at school but coding is not often taught well at school
- Code frequently and from a young age!
- For most of you coding is the **limiting factor** at the moment.

1

Python, python, python!

2

Stay up to date with AI news

- Read tech news to stay up to date → Useful to subscribe to newsletters as it keeps you updated for no cost

2

Stay up to date with AI news

A file with my best sources will be uploaded to day 13 on the website!

AI News Sources

Aa Source	Comment	Overall rating	L	+	...
<u>Top ML papers of the week</u>	Excellent. Usually has some really good papers in the top 10. Very good for top papers of the week.	★★★★★	here		
<u>Twitter</u>	Twitter is fantastic but obviously impossible to look at it without getting distracted!	★★★★★	here		
<u>TLDR AI</u>	Usually okay. Quite sensationalist/tech-focused but has the main stories	★★★	here		
<u>Hugging Face Daily Papers list</u>	Daily newsletter. Provides a list of the 'top' papers on arXiv that day. Okay if you know what to look for but need a lot of time as ~10 a day	★★	here		

3

Get involved!

- Saudi isn't a bad place to be learning AI!
- Get involved in hackathons
- Google, Microsoft and other companies all have outreach programs for young people.
- Join societies

Q&A Continued

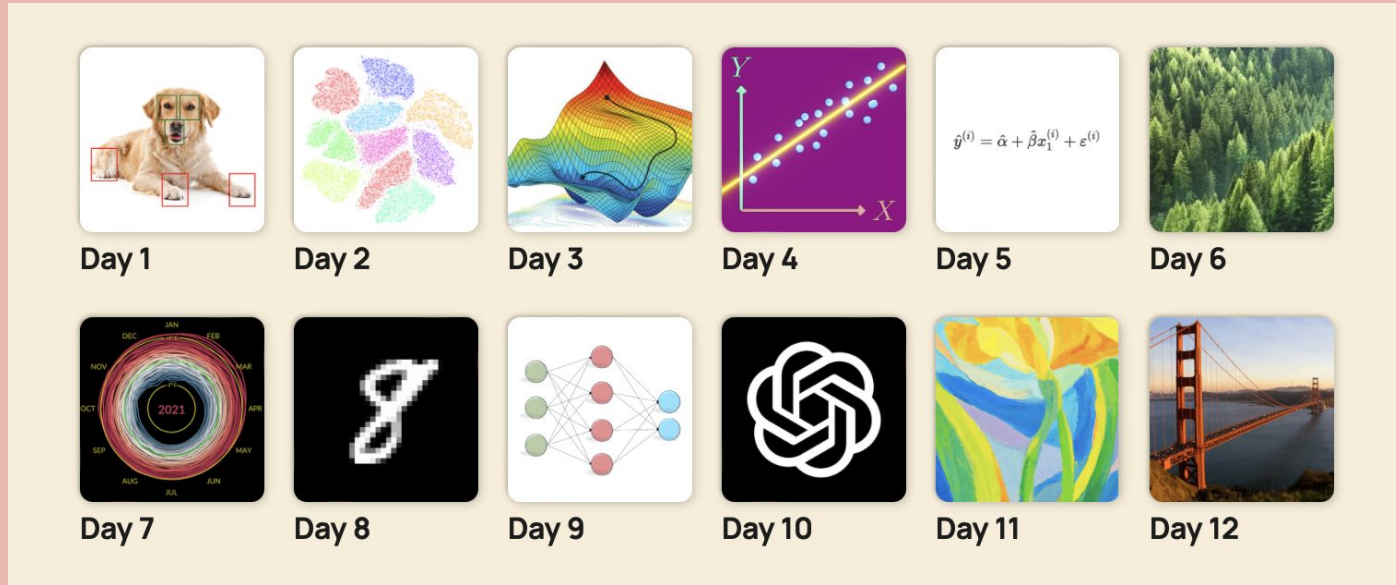

Course Recap

What is AI??

Discussion in pairs

- Do you feel differently about AI now?
- What was the easiest bit of the course?
- What was the hardest bit of the course?
- What do you wish we'd spent more time on?
- What do you wish we'd spend less time on?
- What was your favorite lesson we did?
- Has it made you think differently about university/careers?

What about the slides and notebooks?

They will all continue to be available on the website.

Could be a useful place to start for next steps...

Assessment Feedback
